FINAL DECLARATION FOR AIS CLASS-B SYSTEMS (01.01.2010)

Latest information we had from Turkish authorities on compulsory AIS Class B-CS automatic identification system required at commercial vessels;

Below vessels must be equipped with AIS system, at first documentation after 01 JANUARY 2010

- a) All fishing vessels with the full-length 15 meters and over that make seaboard cruising and/or consecutive seaboard cruising.**
- b) Commercial yachts whose full-length are 15 meter and over.**
- c) 15 meter and above foreign flagged yachts operating with a charter license.**
- d) Passenger vessels carry 12 person or more with a seaboard license, apart from Koycegiz Lake-Dalyan open deck boats.**

According to the description on clause C, system installation on foreign flagged yachts operating with a charter license should be done prior to seaworthiness certificate for 2010 being issued.

Foreign flagged charter boats which does not have MMSI number, should apply to authorities in their flag country to have this device installed.

There is no change on other Turkish or foreign flagged commercial vessels. Should you require additional information, please do not hesitate to contact us.

For your information and consideration.

Kind regards,

N.BORA FİDAN
